

Multi layers inside the BioBlanket are designed to protect the body from external energy emissions incl EMF. These layers are also all present in the InfraBeds ® and Posture~Pillows ® to ensure full cocoon-like protection.

By using BioBlanket over the InfraBed = you multiply infrared and energetic transfer with Radiation and Conduction, by adding Reflection and Convection.

BioBlanket®

Energy Reflection Therapy

BIOBLANKET ® is developed with double Reflective layers, plus a Negative Ions layer, to help to induce the body and mind to rest, recover, rebalance and re-energise. BioBlanket is a 3rd generation ET Energy Blanket and it has evolved as a multi-layered holistic bio-energetic feedback reflective blanket with two distinctly different sides = (Yin + Yang) and **4** different **Purposes**

- 1** to help PROTECT the body by deflecting away external energy influences
- 2** to help REFLECT Back to the body its own energy output = BioFeedback
- 3** to help BALANCE the body's multiple energies, by establishing a Cocoon
- 4** to help RESTORE core body temperature (i.e. BioBlanket over InfraBed)

Whether you use a BioBlanket by itself, Yin or Yang side up or down, BioBlanket gives energy reflection internally and deflection externally.

How does it feel? *"The first thing you feel is complete, pleasant protection. You may feel warmth or subtle energy shifts but these pass as you relax. Within minutes you feel naturally more centred and balanced and calm."*

NB BioBlankets are NOT ARTG listed therapy devices, so no claims are made.

Big BioBlanket is King-Double (**Cocoon**) 240 x 200 cm, quality washable Cotton COVER with Yang activation side and Yin passive side + carry-bag.

"You can lie wrapped in your big BioBlanket around, under, or over you, anytime. Maximum recuperation effects are achieved when fully wrapped, head to toe"

BioBlanket Multi-Layers

- 6 COVER : External Quality Cotton Zip-up
 - a) side - white cotton sheet (logo stitched)
 - b) side - white cotton heavy quilted sheet
- 5 Fifth layer : Bamboo Carbon Fibre
- 4 Fourth layer : Non-woven fabric emits **Negative Ions**
- 3 Third layer : High Quality Reflector Foil facing IN
- 2 Second layer : High Quality Reflector Foil facing OUT
- 1 First layer : Bamboo Carbon Fibre

Protecting
Restoring
Balancing

BioBlankets work by deflecting away external energies that may influence the body and by reflecting back onto itself the body's own bio-energies.

Multi-layers in the BioBlanket are designed to prevent our own energetic emissions from dissipating outwards and so these same multi-layers reflect bio-emissions back onto the body, prompting self-regulation and balance.

Each BioBlanket has two sides, a Yin passive side, and a Yang active side. There's an extra layer that is infused with **Negative Ions** on the Yang side. Depends on the user which is more preferable. Both sides reflect fully.

2 BioBlanket Sizes
King Single 120 x 200 cm
King Double 240 x 200 cm
